

## Call for Fertilizer Project Reports:

The Fertilizer Advisory Committee will meet in Bozeman in February of each year in room 325 Leon Johnson Hall, MSU. Progress Reports (and Proposals; if applicable) are due no later than mid-January each year (due date will be sent to PIs when determined).

Please submit your progress report electronically to [paceley@montana.edu](mailto:paceley@montana.edu). Your written reports should be a maximum of six (6) pages and address the following:

1. Project Name
2. Principal Investigator and Cooperators
3. Objectives
4. Materials and Methods
5. Project Results and Relevancy to Montana
6. Termination Date

Please indicate **“Progress Report”** on top of the title page.

You will be expected to present your results to the Fertilizer Advisory Committee at their annual meeting in February. If there is a time conflict or travel is unreasonable, please consider providing a taped presentation, or assign someone to present your results. We can follow this up with a scheduled conference call as well, if necessary.

If you will be requesting funds for a continuation of this “work in progress”, you will make your presentation immediately following your report. If you have any questions, please call Tracy Sterling at (406) 994-4605.
